

Comprehensive Safety Resource, LP

Risk Control Capabilities:

Comprehensive Safety Resource is a full service loss control safety company providing a wide range of safety-related services, and safety training. Wherever your business takes you, CSR can support you.

CSR has worked with numerous clients of all sizes throughout the United States to develop customized safety programs, conduct OSHA compliance reviews, employee safety training programs, forklift certification training, first aid/CPR training, industrial hygiene air and noise monitoring, program reviews, safety audits, risk management inspections, safety committee meetings, and more. Areas of specialty include program development, industrial hygiene services, evaluation and reduction of loss and hazard exposures, OSHA compliance, and employee training in industrial, construction, commercial and public settings. CSR will work with you to develop safety training that is specific to your needs.

Risk Assessments: CSR can conduct full Safety Audits for on any industry. Our consultants can conduct full OSHA Audits, Insurance Surveys (all lines), Program Evaluations as well as Industrial Hygiene Exposures. A full written report with recommendations and suggestions on 'How to avoid future risks' will be provided.

Safety Manual Development and updating: Current Safety Programs can be reviewed and updated or they can be designed specifically to fit your needs. All programs will exceed the OSHA recommended standards. CSR has written Numerous Safety Manuals for all types of Industries.

Industrial Hygiene/Air Monitoring: CSR can provide all types of noise and air monitoring for any type of operation. CSR owns and maintains their equipment, with **no** additional fees for equipment rental. CSR utilizes a certified laboratory for all sampling analysis and all work is overseen by a CIH (Certified Industrial Hygienist).

Regulatory Consulting: CSR is equipped to assist in various regulatory related services (DOT, OSHA). To include mock OSHA inspections, program review, training courses, remediation strategies and developing responses to inquiries and inspections.

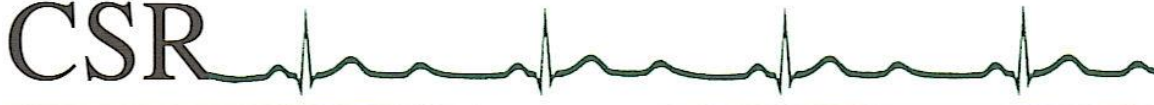

CSR can run and maintain all aspects of Construction and General Industry / Safety Programs: These services can include but are not limited to:

- Site Evaluations
- Training (Onsite or Toolbox topic services) 10 & 30-hour OSHA classes
- Accident Investigations
- Maintain records - OSHA 300 logs, exposure records
- Written Safety Manual (English/Spanish)
- Excavation & Trenching Programs
- Personal Protective Equipment Selection
- Fall Protection Procedures

CSR has been hired by numerous contractors to run and supplement their safety programs and will meet the OSHA inspector's onsite and assist in representing our clients.
